## RFI Corporation opens West Coast Office, expands Domestic Operations

**RFI Corporation has announced the expansion of operations with the opening of a West Coast Technical Development and Support Center to cover the increasing business base in California, Oregon, Washington and adjacent states.**

Bay Shore, New York - RFI Corporation, a subsidiary of Del Global Technologies Corp., the industry leader in the manufacturing of EMI / RFI / EMC filters, Capacitors and Magnetics, today announced the opening of a West Coast office to service and support the expanding customer base in the western United States.

The satellite office will be staffed by Product Development Engineers and support personnel to provide a higher level of service to the region's customers. High Voltage Magnetics system design and Pulse Power research and development will be performed out of both the Bay Shore, New York and the Santa Cruz, California locations. Production expansion is planned for the West Coast Support Center in the future.

"Over the course of the last year, RFI has experienced significant growth in the region and we have identified a need to expand operations to support this increasing customer and business base". Said Roy Torzullo, Vice President and General Manager of RFI Corporation. "The newly created Support Center will establish a regional base for customer support, technical product development and sales functions to provide a higher level of service to all customers on the west coast. We have been successful growing our business and see this expansion as a critical next step in the attainment of our strategic growth plans".

### About RFI Corporation

RFI Corporation was established in 1961. RFI Corporation, an AS9100/ISO 9001:2000 certified company, is the industry's leader in EMI/RFI/EMC technology, products, and services used in the commercial, medical and military markets. With over 100,000 existing designs, and a customer base over several thousand strong, some of RFI Corporation's competitive advantages include filter products / EMI/EMC/RFI power filters, filters for system compliance to MIL-STD-461, UL filters, QPL filters to MIL-PRF-15733 and communication and data filters. RFI Corporation also offers magnetic components such as high-voltage pulse modulators, pulse packages, pulse forming networks, pulse & power transformers and reactors, high-voltage capacitors, reconstituted mica capacitors, high & low frequency capacitors, and a variety of other products designed for military, medical and other commercial applications.
